

**International Journal of Informatica (ISSN 0350-5596)**  
(<http://www.informatica.si/>)  
**Special Issue on Computational Linguistics**

**CALL FOR PAPERS**

In the last two decades, an exponential increase in the available electronic information causes a big necessity to quickly understand large volumes of information. It raises the importance of the development of computational methods for processing this information. The area of Computational Linguistics is an active research area dedicated to describe the modern models of how Natural Language Processing (NLP) systems function, explains how to compile the data for the necessity of NLP systems: develops software for grammars correction, resolves word sense disambiguation, constructs dictionaries and databases, retrieves information, translates automatically from one language to another, etc. As many other areas (for example, such as mechanical and engineering areas), CL has the necessity of intelligent language processing tools and automation of NLP tasks.

This special issue aims to bring together research work in the area of computational linguistics, investigate the novel solutions and discuss the future trends in this field.

**Topics**

The topics include but are not limited to:

Computational Linguistics  
Natural Language Processing  
Question Answering  
Text Summarization  
Other issues in computational linguistics

**Submission**

Informatica is an international refereed journal with its base in Europe. It has entered its 30th year of publication. It publishes papers addressing all issues of interests to computer professionals: from scientific and technical to educational, commercial and industrial. It is indexed by Citeseer, Compendex, Computer Science Index, DBLP Computer Science Bibliography, Inspec, etc.

Concerning the preparation of the manuscript, please refer to the "Instructions for Contributors" page at the journal website, <http://www.informatica.si/>. Further, the manuscript must be submitted in the form of PDF file to one of the special editors ([yledeneva@yahoo.com](mailto:yledeneva@yahoo.com)) or to the Managing Editor, Prof. Matjaz Gams ([matjaz.gams@ijs.si](mailto:matjaz.gams@ijs.si)). The submission must include the title, abstract of your paper, and the corresponding author's name and affiliation. All papers will be rigorously reviewed based on the quality, originality, high scientific quality, well organized and clearly written, sufficient support for assertions and conclusion.

**Important Dates**

Submission deadline: December 15, 2008  
Notification date: January 15, 2009  
Camera-ready due: January 30, 2009  
Publication date: 2009

**Guest Editors**

Prof. Yulia Ledeneva

Autonomous University of the State of Mexico, Mexico

E-mail: yledeneva@yahoo.com

Prof. Grigori Sidorov

National Polytechnic Institute, Center of Computing Research, Mexico

E-mail: sidorov@cic.ipn.mx
