

1. [INF] RECONNOITERING SECURITY ALGORITHMS PERFORMANCE IN THE CLOUD: SYSTEMATIC LITERATURE REVIEW BASED ON THE PRISMA ARCHETYPE.
2. [INF] Analysis of emotional data for refining a product's quality.
3. [INF] Machine Learning Algorithms for Transportation Mode Prediction: A Comparative Analysis.
4. [INF] Decision Tree-Based Methodology for Fetal Health Risk Classification from Cardiotocographic Dataset: CART Model.
5. [INF] Offensive Language and Hate Speech Detection Using Transformers and Ensemble Learning Approaches.

FAST REVIEW:

Please note that there is also an option to enter the procedure guaranteeing your manuscript will be reviewed in less than 6 months. You do so by sending an e-mail to amsinformatica@ijs.si with the information from above and indicate which articles which authors want to review from this list:

<https://docs.google.com/spreadsheets/d/1h-OTPzlccJdIDogRy4yOaq16Vn3Ah5i3AD2MScrQUV0>.

Each of the authors will be assigned a manuscript to review. If more than half of the authors submit their quality review in 1 month, the original manuscript is guaranteed to be reviewed in 6 months from submission. If no review is obtained in 6 months, the authors are invited to submit an e-mail to matjaz.gams@ijs.si and amsinformatica@ijs.si to check the status of their submission. If reviews by the co-authors are delayed, the guarantee for the review of their manuscript extends for the same amount of time.
